Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-3, 5-8, 51-53, drawn to an isolated polypeptide with an R-X-R sequence, nucleic acids encoding such polypeptides, and a method of identifying a therapeutic agent for treatment of CF.

Group II, claim(s) 9-14, drawn to a method for identifying an agent that increases transport of an export-incompetent protein.

Group III, claim(s) 15-32, drawn to a method for treating a subject with CF.

Group IV, claim(s) 33-37, drawn to a method for identifying an agent that inhibits interaction between an R-X-R polypeptide and an ER retention factor.

Group V, claim(s) 38-42, drawn to a method for identifying an ER retention factor.

Group VI, claim(s) 43-50, drawn to a method for inhibiting degradation of a protein in a cell by contacting it with an R-X-R containing polypeptide.

The inventions listed as Groups I-VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Groups II-VI are drawn to methods different in design and performance, and which do not share the same or a corresponding special technical feature which define the contribution of each invention. The methods of Groups II-VI do not share a corresponding special technical feature because the methods are practiced with materially different process steps for materially different purposes and each method requires different starting materials, process steps and goals.

Art Unit: 1646

Since these special technical features are not shared by each process, and since the common features do not establish an advance over the prior art, the inventions of Groups II-VI do not form a single inventive concept within the meaning of Rule 13.2.

The invention of Group I is separate and distinct from the invention of Groups II-VI because the invention of Group I may be used in other methods than those of Groups II-VI, such as in the production of the protein of interest.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
